

Cassette-corder

TCM-27

Operating Instructions

Before operating the unit, please read this manual thoroughly and retain it for future reference.

Owner's Record

The model number is located on the left side and the serial number is located in the battery compartment. Record the serial number in the space provided below. Refer to these numbers whenever you call upon your Sony dealer regarding this product.

Model No. TCM-27 Serial No. _____

Features

- With the time-index-recording function the date and time of recording and a memo appear in the display window during tape playback.
- Timer function starts the tape playback and recording at any desired time with the built-in timer.
- Cue marker and auto-stop function for searching for a particular point quickly.

Precautions

On operation

- Operate the unit on 3 V DC. For AC operation or car battery operation, use accessories recommended for the unit.
- Do not leave the unit in a location near heat sources, in a place subject to direct sunlight, excessive dust, sand, moisture, rain, mechanical shock, in the direct sunlight, temperature below 5°C, or in a car with its windows closed.
- If the unit has not been used for a long time, set it in playback mode and warm it up for a few minutes before inserting a cassette.
- Should any solid object or liquid fall into the unit, remove the batteries and disconnect the AC power adaptor, and have the unit checked by qualified personnel before operating it any further.

- Since a strong magnet is used for the speaker, keep personal credit cards using magnetic coding or spring-wound watches away from the unit to prevent possible damage from the magnet.
- The nameplate indicating operating voltage, etc. is located on the bottom.

Note on cassettes longer than 90 minutes

The use of cassettes longer than 90 minutes is not recommended except for long continuous playback.

If you have any question or problem concerning your unit that is not covered in this manual, please consult your nearest Sony dealer.

INFORMATION

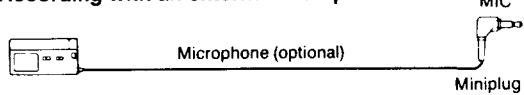

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna
- Relocate the equipment with respect to the receiver
- Move the equipment away from the receiver
- Plug the equipment into a different outlet so that equipment and receiver are on different branch circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful:
"How to Identify and Resolve Radio-TV Interference Problems". This booklet is available from the U.S. Government Printing Office, Washington, DC 20402, Stock No.004-000-00345-4.

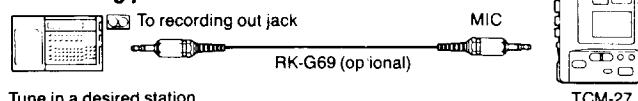

Connections/Preparations

Recording with an external microphone

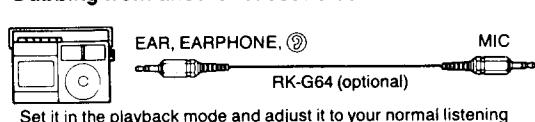

When a microphone with PLUG IN POWER system is connected, power is supplied with the microphone from TCM-27.

Recording from a radio or TV equipped with a recording jack

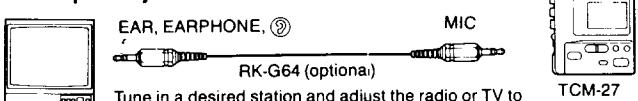

Tune in a desired station.

Dubbing from another cassette-corder

Set it in the playback mode and adjust it to your normal listening level.

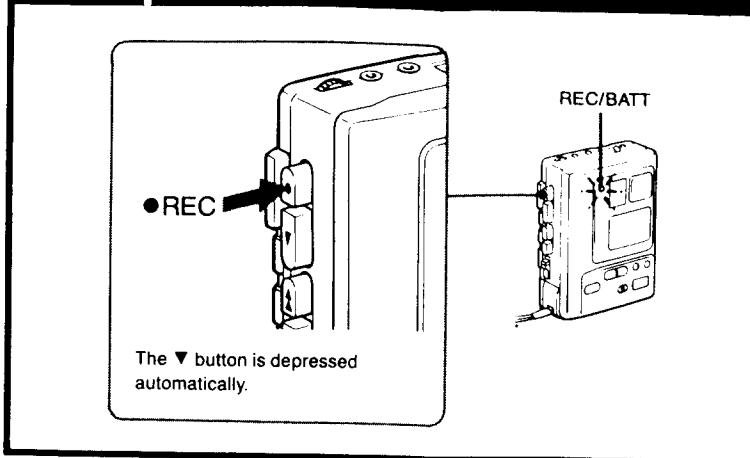

Recording from a radio or TV equipped with an earphone jack

Tune in a desired station and adjust the radio or TV to a normal listening level.

If your radio, TV, etc., is not Sony product, refer to the instruction manual of that unit.

Recording with the Built-in Microphone

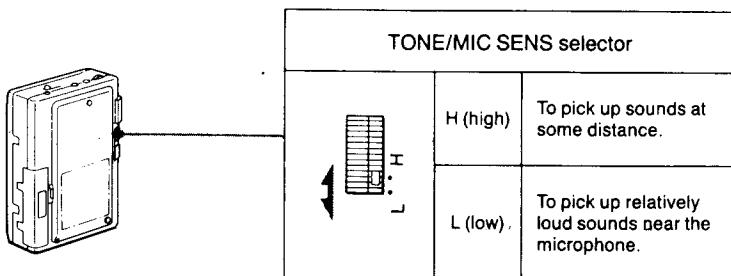

No recording level adjustment is necessary.

The sound to be recorded can be listened with the optional earphone.

Notes

- Do not press the built-in microphone forcibly.
- When monitoring with the earphone, do not set the volume too high. Otherwise, a howling effect may occur.

Adjusting the Microphone Sensitivity

To review the portion just recorded

Simply depress the \blacktriangle button while recording.

By releasing the \blacktriangle button, the recorder will go into the playback mode for review of the recorded material.

To start recording again, depress the ● button.

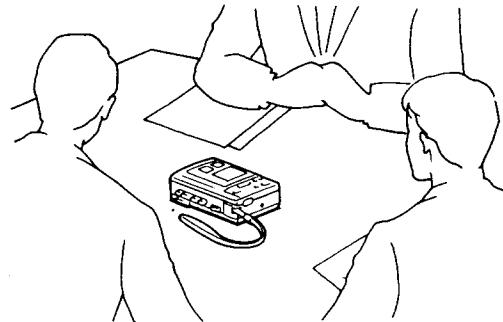

To correct a previously recorded portion

During playback, simply depress the ● button and the recorder will immediately change to the recording mode.

Notes

- Make sure that nothing is connected to the MIC jack.
Otherwise, a recording with the built-in microphone cannot be made.
- When you record with an external microphone, you cannot adjust the microphone sensitivity.

To pick up the speaker's voice more clearly at the conference
Place the unit on a table horizontally for maximum performance of the
built-in flat microphone (Sony Boundary Effect system).

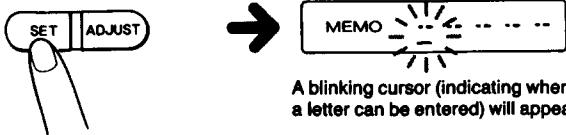

Recording from Various Sound Sources

To record, depress the ● button of the TCM-27 after completing the connections and preparations below.

Entering a Memo during Recording —Time-Index-Recording Function

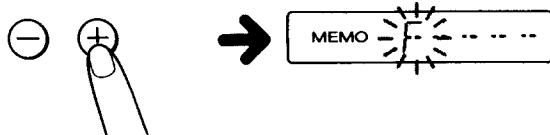

You can create a memo or a label of up to 5 letters for the material to be recorded.

1 Press SET.

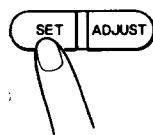

2 Press + or -, until the first letter you want appears.

Example: If + is pressed 6 times, F will appear.

3 Press to move the cursor to the next position,
and use either + or - to select the next letter.

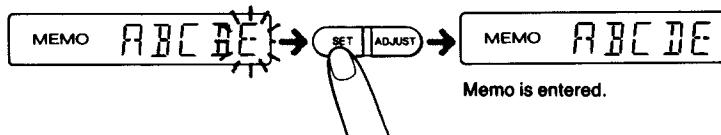

4

Repeat steps 2 and 3 to complete the memo.

5

After setting the fifth letter, press SET.

(If you want to use fewer than 5 letters, press SET several times to complete the setting.)

6

Start recording.

(The date and time will be entered automatically.)

If you want to change the memo, follow the procedure from step 1. If you want to change the memo while recording, stop the cassette for a moment with the PAUSE switch.

37 characters and a space can be used for the memo.

Each time + is pressed, characters will appear in the following order.

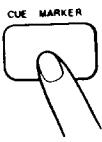

-- ABCDEFGHIJKLMNOPQR
STUVWXYZ 0123456789 (Space)

Use - button to go back to a previous character.

Note

- When recording, use only TYPE I tapes. If you use another type of tape, the time-index-recording may not function.
- For the time-index-recording function, it is necessary to record continuously for more than 10 seconds. If the recording is less than 10 seconds, you cannot enter the memo, date, or time.

Assigning a Cue Marker During Recording

Press at the position you want to listen to afterward.

CUE MARKER indicator lights up and a cue marker is assigned.

You can locate the cue marker position quickly by pressing FF/CUE or REW/REVIEW button during playback. (See "Locating the CUE MARKER position".)

When recording starts (including after a pause)
A cue marker is assigned automatically.

When you will not use the auto stop function
Slide AUTO STOP switch to OFF.

Notes on the cue marker

- You can assign as many cue markers as you want.
- If you press STOP immediately after pressing CUE MARKER, the cue marker is not assigned.
- After pressing CUE MARKER, wait until the indicator goes out before continuing to record.
- When you play back the tape recorded with a long passage of low frequency sound, the unit may not function correctly.

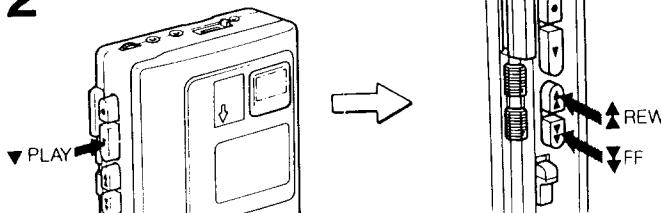

Locating the Cue Marker Position —Auto Stop Function

1

Slide AUTO STOP switch to ON.

2

Keeping PLAY depressed, press \blacktriangle REW/REVIEW or \blacktriangledown FF/CUE button continuously.

3

At the cue marker position, the cassette stops automatically.

Release \blacktriangle REW/REVIEW or \blacktriangledown FF/CUE button to start play back.

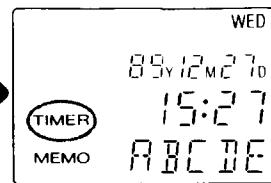

Recording with the Timer

—Timer Function

1

Display
TIMER indication.

2

Set the timer for the date and the time
you want recording to begin.

(See How to Set the Date/Time.)

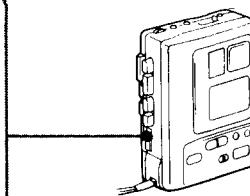

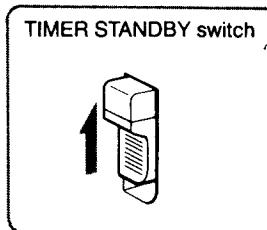

3

If you want to make a label for the
material to be recorded, enter a memo.

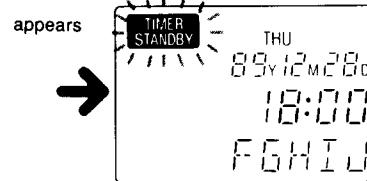

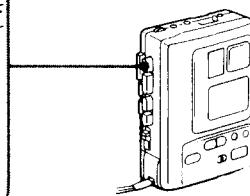

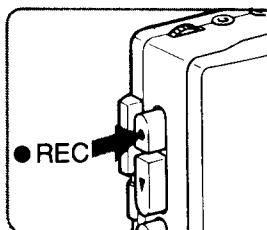

(See Entering a Memo during Recording.

Be sure to set the timer before entering
a memo.)

4

5

Recording will start automatically at the time set.

When entering a memo

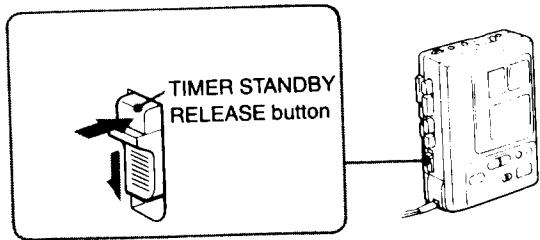

Be sure to set the timer before entering a memo. You cannot enter a memo before setting the timer.

You can start the playback at the time set.

For the step 5, press ▲ button in place of ● button.

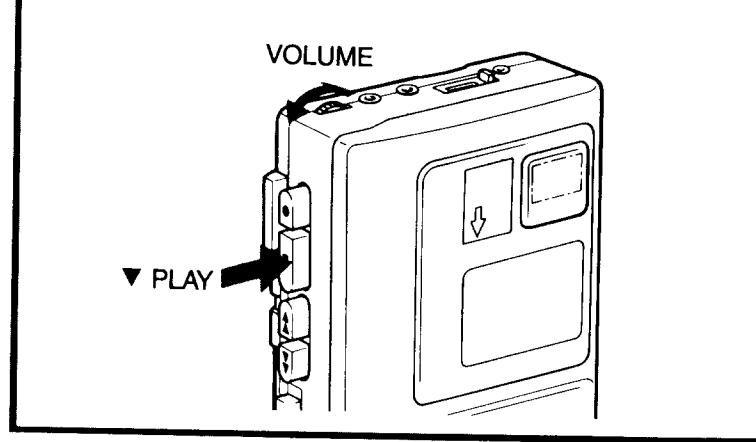

To Release the TIMER STANDBY Switch before the Preset Time

Press the ■▲ button and press the TIMER STANDBY RELEASE button.

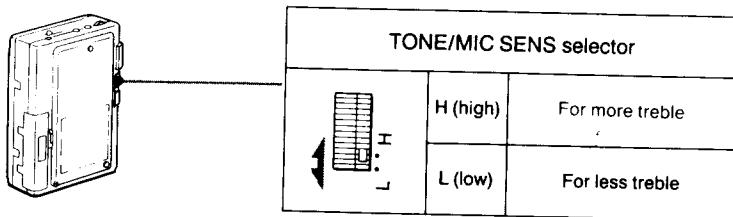

To check the time set for the timer recording
Press DISPLAY MODE so that "TIMER" indication appears. The indication displayed is the time set.

Tape Playack

To adjust the tape playback tone

To locate a desired position during tape playback

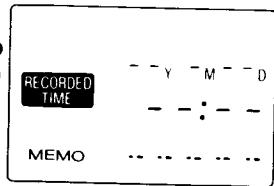

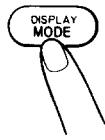

Keep pressing the \blacktriangle or \blacktriangledown button during playback. At the desired point found by listening to the high-speed sound, release the pressed button to restart playing back.

To stop the tape	To rewind the tape
A line drawing of the front panel of a cassette deck. A black arrow points to the 'STOP/EJECT' button, which has a small square icon above it.	A line drawing of the front panel of a cassette deck. A black arrow points to the 'REW' button, which has a small upward-pointing triangle icon above it.
To advance the tape	To stop the tape momentarily
A line drawing of the front panel of a cassette deck. A black arrow points to the 'FF' button, which has a small downward-pointing triangle icon above it.	A line drawing of the front panel of a cassette deck. A black arrow points to the 'PAUSE' button, which has a small horizontal bar icon above it. Below the PAUSE button, the text 'To restart, slide it up' is written.

Displaying the Memo and Date/Time during Playback

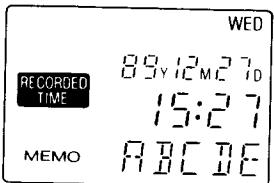

1

Press during playback to display the "RECORDED TIME" indication.

2

The date and time of recording and the memo will be displayed after a short time.

Information Display

Each time you press DISPLAY MODE, the display changes in the order indicated by the arrows.

Current date/time display

"CLOCK" indication is displayed.
The current date and time are indicated.

Timer display

"TIMER" indication is displayed.
The date and time set for the timer are displayed. (When the timer is not set, the current date and time is displayed.)

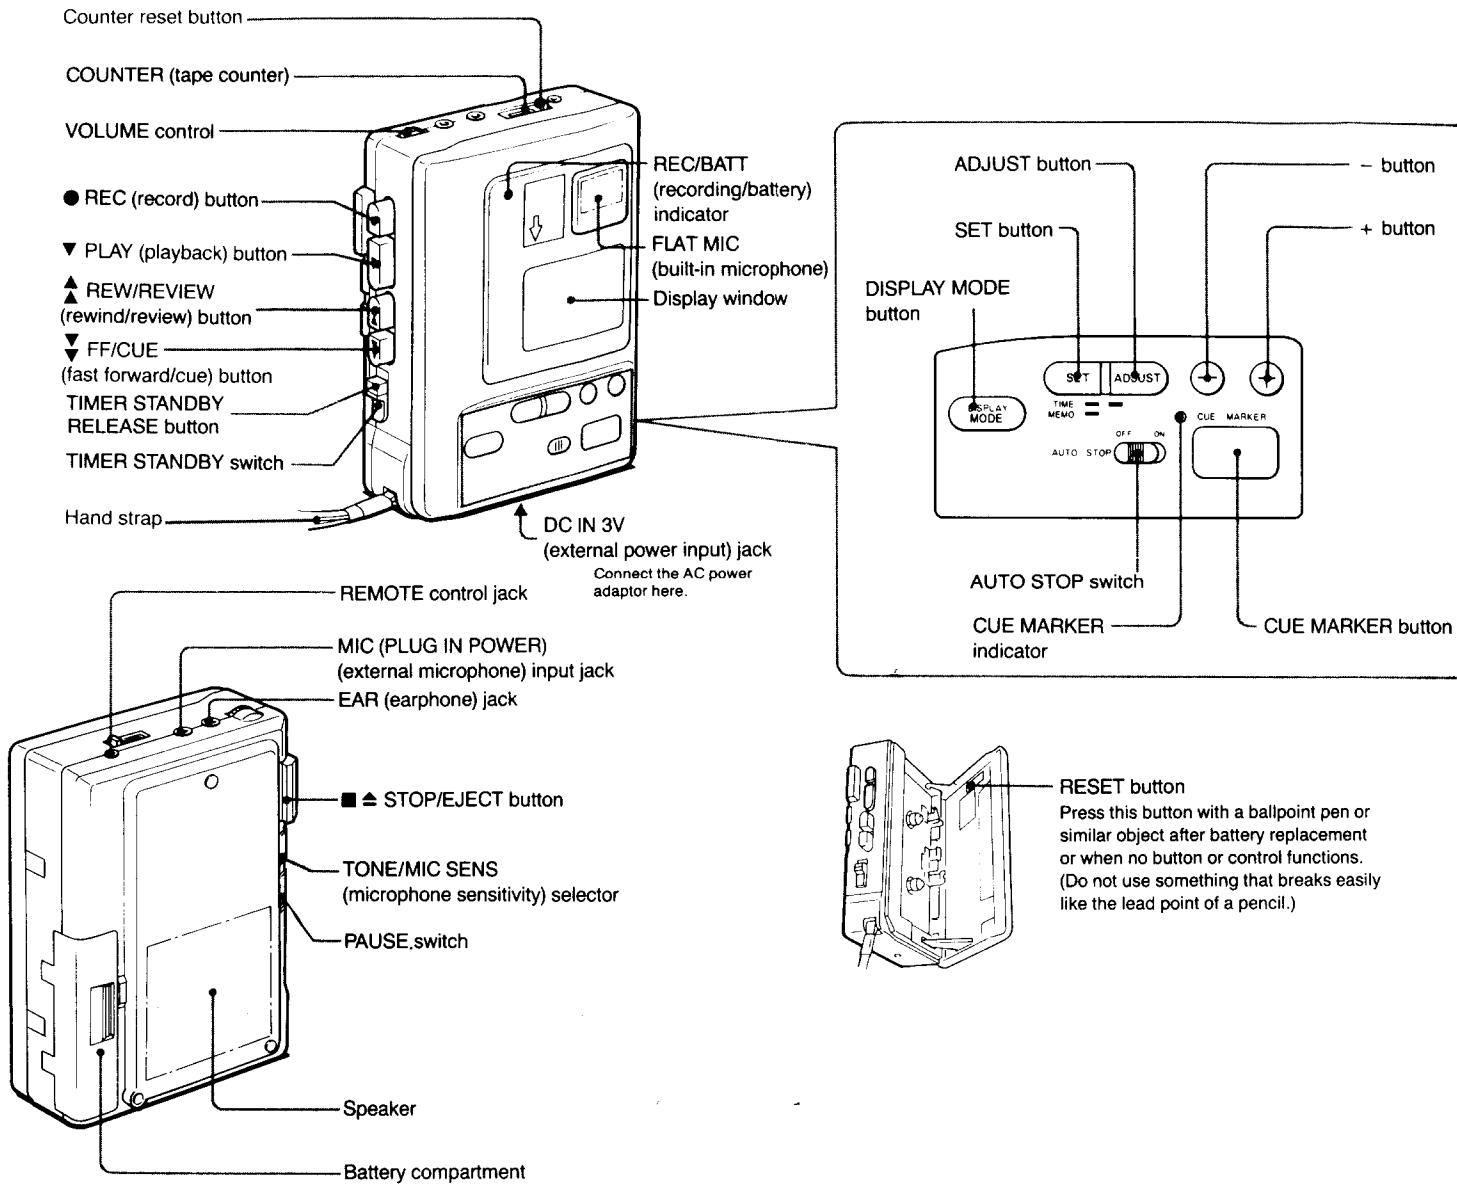

Memo display

"RECORDED TIME" indication is displayed. The date and time of the recording and the memo will be displayed only during playback (not during recording).

Note

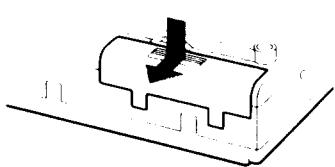

After displaying the date and time of recording and the memo, the indications remain displayed if you play back a cassette recorded on equipment other than the TCM-27.

Parts Identification

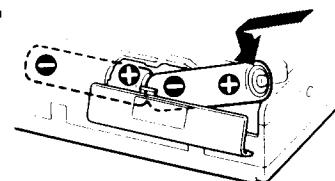

Installing Batteries

1

2

Insert two size AA (R6) batteries with correct polarity.

Battery replacement

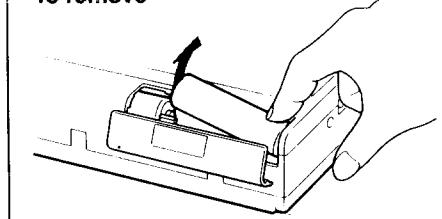

During tape playback, when the indicator glows faintly and sound becomes distorted or unstable, replace both batteries.

On battery life and other power sources, see "Specifications".

To keep the preset memories

Replace the batteries **within two minutes**.
The memories of the current time and a memo will be erased about two minutes after the batteries are removed.

To remove

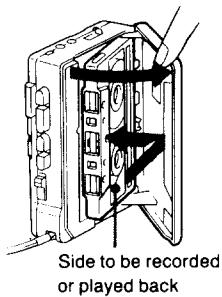

When no button functions after replacing the batteries

Press the RESET button, and preset the indications.

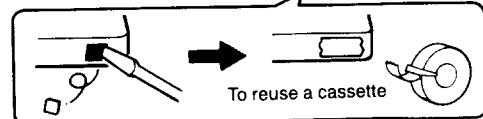

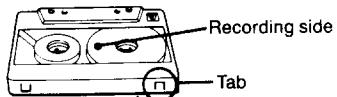

Inserting a Cassette

Before inserting the cassette, take up any slack in the tape with a thick pencil.

To prevent accidental erasure

Break out the tab corresponding to the side to be recorded on.
Recording on that side will be protected.

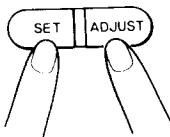

How to Set the Date/Time

You cannot set the clock during tape playback or recording.

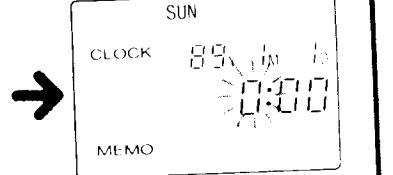

If "CLOCK" indication is not displayed, press DISPLAY MODE several times until "CLOCK" indication appears.

Example: To set the time/date to 1:05 p.m., December 27, 1989

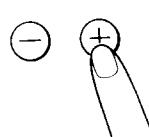

1

Press SET while keeping
ADJUST pressed.

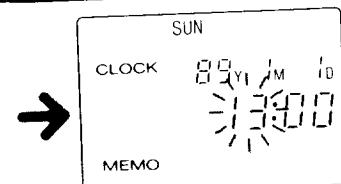

2

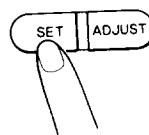

Set the hour using the + or
- buttons.

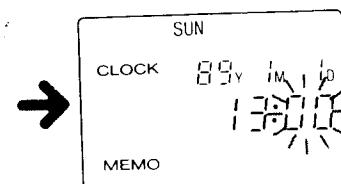

When the + or - button is kept
pressed, the digits advance rapidly.

3

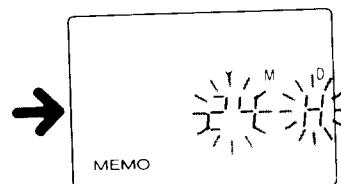

Press SET to make the minute
digits blink.

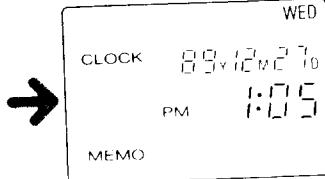

4

Set minute, month, day, and
year in sequence.
First adjust the blinking item with +
or - buttons, and then press SET.
(The day of the week is automatically
set when the year, month and
the day are registered.)

5

Choose the 12- or 24-hour
indication and then press SET.
A flashing "12H" and "24H"
alternately appear with each press
of the + or - button.
The clock will now start.

To change the date/time

Press SET while keeping ADJUST pressed.

Press SET several times to make the digit you
want to change blink. After changing the number,
press SET several times (or press DISPLAY

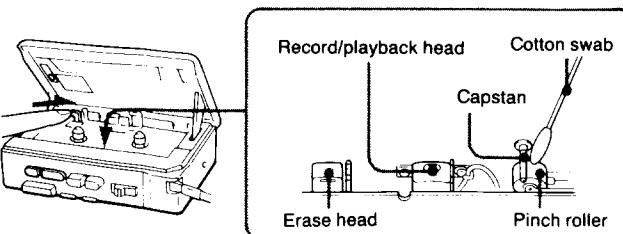

MODE once) until "CLOCK" indication appears.

Maintenance

Cleaning the heads

Prolonged use may contaminate the tape heads and the tape path. Contamination causes insufficient recording or sound drop-outs in playback.

To enjoy optimum sound, wipe the heads, capstan and pinch roller with a cotton swab moistened with alcohol after every 10 hours of use.

After cleaning, press the ■▲ button.

Cleaning the case

Do not use alcohol, benzine or thinner to clean the case.
